

SUMMER TERM NEWSLETTER

WELCOME

Dear parents, carers and the community,

It is with great pride I can share the summer newsletter with you all. Throughout a range of subjects, with a variety of partners and in many different areas around the region, you can see the children enjoying their experiences, having fun and engaging in meaningful real-life learning opportunities. It has been wonderful to have a more normal summer for the first time in three years, and to celebrate the historic Jubilee.

We also have exciting developments with a new Trust website which can be viewed at www.teesvalleyeducation.co.uk, we would love to hear your feedback.

Our Year 6 children leave us for secondary in a couple of weeks, having matured into wonderful friends and citizens, who have also done incredibly well in their SATs despite two years of interruption. We all wish them well in Year 7.

Congratulations go to all of our amazing Diamond Standard nominees and the winners. The courage, care, commitment and curiosity that they show and share with us all is amazing. I'm also incredibly proud to introduce the newest award - the Karen Gleave Memorial overall diamond. This is for the child or person who shows all four of our standards whilst constantly helping, supporting and championing others, just as Ms Gleave did.

Additionally, there are some wonderful sports champions across the Trust who did extremely well in local and regional events. Learning and talent displayed by every child is celebrated, encouraged and nurtured in the Trust. We are all looking forward to building upon these experiences next year, but in the meanwhile, the staff and I wish you all a super summer holiday.

MISS K MORLEY
CEO
TEES VALLEY EDUCATION

Disability Awareness Week

Disability Awareness Week is a week long annual campaign promoted by Mencap which aims to make sure the world hears what it is like to have a learning disability.

The theme this year was linked to the importance of friendships and communities which we appreciate is important to everyone. Having some form of independence in our lives is something many of us take for granted and friends and support from local community groups can support with this.

Pupils in academies across the trust recognised Disability Awareness Week by thinking about what makes them happy and the importance of friendships to help us feel we 'belong.'

Some children wrote about what makes them feel proud and how the important people in their lives help them to succeed.

Pupils used art to create mindfulness designs and Discovery Special Academy plan to use these wonderful pieces of work to decorate areas of the new academy building.

Learning Disability Week

BRAMBLES PRIMARY ACADEMY

Camping

Our Year 6 pupils have celebrated the end of their time at Brambles with our annual camping trip to Lordstones Country Park. This involved three days and two nights spent enjoying the North York Moors National Park. The children arrived on Monday morning and promptly set up the campsite with all tents and equipment they would need to live outdoors for the time period. Over the three days the children covered over 10 miles of walking with a particularly long walk on the second day taking in the North Yorkshire Three Peaks from Lordstones over to the Wainstones and back. In addition to the walking, the children took part in a host of other activities including weaselling through rocks, team building challenges and even a talent competition. It was a fantastic adventure and a great way for them to celebrate after all their hard work throughout year 6.

Sports Day

Our EYFS took part in Sports Day together this week. We split into teams and enjoyed taking part in eight different activities. We had egg and spoon races, welly throwing and water collecting to name just a few! Nursery and Reception children all took part and the staff were so proud of everyone. It was lovely to have Parents, Grandparents, Aunts and Uncles to come and watch – they were great at cheering the children on!

Key Stage 1 and 2 sports days were split over two days but all children were involved in a wide range of races and activities that ranged from running and jumping to throwing and shuffling. It was a fantastic day enjoyed by all and it was brilliant to have parents and carers back to see the children enjoying sport outdoors.

BRAMBLES PRIMARY ACADEMY

Animex Day

The Animex day was a great stimulus for the Y2 children to develop and practise their coding skills to create a short animation. We used the fun children's book, *The Queen's Knickers*, as a base for our animation. First, we created a story board to outline the main four events of the narrative. We then selected a female sprite for the Queen and a male sprite for the butler who searches desperately to find the Queen's missing knickers trunk. The children enjoyed using Scratch to design their own version of a story that they have loved reading this year.

Diamond Jubilee

Brambles celebrated the Queen's Jubilee in true Brambles style. We started the day with a whole school assembly to celebrate our Jubilee Crown competition. Children across the whole academy were invited to make a Crown at home to bring into school. It was a difficult decision trying to pick winners however, each year group had a very worthy winner, each winning a prize. The children decorated the corridors with bunting, paper chains and made flags. Each year group celebrated a decade from the Queen's reign working together to create a special poster. At lunchtime, we had a whole school outdoor picnic with music playing.

The atmosphere was fantastic – especially when all of the children joined in singing 'Sweet Caroline'. In the afternoon we split the time so everyone had a turn of playing games on the field – mini golf, ring toss and limbo to name a few – then a craft session making a carriage for the Queen, a lolly stick soldier and an Andy Warhol inspired collage of the Queen. Each child in school received a very special keepsake book and button badge to remember the day. The children thoroughly enjoyed the learning that took place and the celebrations to finish the half term.

DISCOVERY SPECIAL ACADEMY

Swimming

All children in Year 5 and 6 have now completed their swimming lessons in groups of four to support their confidence in the water. We are looking forward to a whole class swim experience at the end of this term where we can show off our skills to each other and celebrate our swimming successes!

World Environment Week

To recognise this extremely important event and help us all remember how important the environment is, we sang, painted, explored and shared our love of the world. Please take the time to visit our website to see what the children have learnt in our World Environment Day in our video about it.

Maths Day

We celebrated the importance of numbers by dedicating a whole day to exploring and experimenting with a variety of maths resources. Maths was taken outdoors for a physical approach where children completed number hunts, target practice and 3d tower building competitions. Children from Reception, turned maths into a creative, sensory experience and got themselves number messy!

Road Safety

Knowing how to keep ourselves safe is an essential 'preparing for adulthood' skill. To help us understand the importance of road safety, experts from Middlesbrough Environment City joined our Key Stage 2 classes for a morning of practical experiences designed to help us remember how to keep safe near roads.

DISCOVERY SPECIAL ACADEMY

James Webb Telescope Workshop

Pupils in Year 5 and 6 had the opportunity to work with an artist and a scientist! The children were able to share prior knowledge of space and their understanding of telescopes before creating their art. They learnt lots of new science vocabulary and were lucky enough to ask the scientist some questions about her work.

Walk to School Week

Many of our pupils come to school on the bus, but this did not stop us recognising the importance of exercise and being outdoors! All children walked around the outdoor environment of school each day and counted the steps and miles they completed.

The Queen's Platinum Jubilee

The staff and children at Discovery had a day of royal activities and then everyone came together for a finale tea party on the playground. All children had learnt to sing and sign the National Anthem and when they all came together to perform it at the end of the day, it really was a truly memorable occasion.

DORMANSTOWN PRIMARY ACADEMY

Redcar Lifeboats

As part of our local study in history, 4HM explored the background of the lifeboat in Redcar including, the oldest surviving lifeboat the 'Zetland'. Children then took time making comparisons with today's lifeboat service and the creation of the RNLI. We had the opportunity to meet the first lady to be part of the Redcar lifeboat. The children were in awe of her, and this even inspired some children to want to become a crew member. All of Year 4 finished the topic understanding how vital the lifeboat service is to a small coastal town such as Redcar, by the study of historical events through to present day.

I loved the topic of lifeboats because the RNLI is really important as it has saved lots of lives at sea.

It was good to learn about the engines of the boats and how they were powered, as well as learning about safety at sea.

World of Work Event

In June, Year 6 entered the world of work at the rather plush, new headquarters of AV Dawson, a logistics firm, based in Middlesbrough. The sessions included: surveying the scene, meeting and greeting their aptly named robot, exploring what was on offer in the Tees Valley, thinking about and considering their future, especially with regard to employment and a career.

Working collaboratively, the children were able to practise and develop: a wider understanding of the local area; an understanding of which companies are based in the area; an understanding of what different companies do and what roles they have as well as cultural capital focussed on agency in the local workplace.

The children were enthusiastic participants, who showed great resilience and patience in keeping on track and completing the various tasks, despite some technical issues at times - definitely some engineers of the future! Two special bonuses too: tracking and watching a ship docking and a tour of the beautiful building and surrounding area, courtesy of unofficial tour guide, Mr Stogdale.

Dreaming of Australia

As part of their Geography topic, Year 2 looked at the job of a travel agent and shared travel brochures to support the production of leaflets about Australia. The children worked collaboratively to research more information about Australia and why people visit there. Then they created a leaflet to present to the rest of the class on some of the reasons to visit Australia. The children thoroughly enjoyed this project and had an Oracy debate on whether they would like to visit the country or not.

DORMANSTOWN PRIMARY ACADEMY

Joe Cornish Art

5H enjoyed researching the artist Joe Cornish who is a successful nature photographer, mainly based in the North East. He is skilled in using perspective and the contrast between light and dark to create mood in photographs. After our research, it was time for 5H to create their own photographs in nature that were inspired by his work. To do this we spent an afternoon in Fox Rush Woods. We did get rained on – but this just made our photos better! The children fully enjoyed this experience and have been asking when they can next do photography again.

EYFS visits in our local area

Reception visited Newham Grange Farm to learn all about farming. We had a tour around the large livestock and found out lots of interesting facts about the animals. We also stroked and held the guinea pigs, rabbits and tortoise. The children had a great time in the discovery room, observing the bees, and we even had fun milking a cow. Later we played mini golf and had fun at the park. It was an amazing day that we will never forget.

Nursery had a very busy day exploring nature and discovering minibeasts at Hardwick Park. At the park, we had so much fun searching for bugs and looking close up at them in our special bug catchers. The visit was topped off with a fantastic workshop all about 'The Hungry Caterpillar'. We made butterflies out of natural materials and had to search for the food from the story that was hidden in the woods. Nursery walked over 8,000 steps but everyone had the biggest of smiles.

Jubilee Celebrations

We had a wonderful week of activities to celebrate the Queen's Platinum Jubilee. The children undertook lots of activities linked to the history of the royal family, and we had a whole school project of making portraits of the queen in different media in art which we used to make an impressive display.

We were delighted to welcome Urban Kaos into the academy who taught each class "A Royal Mash Up" of dances from throughout the queen's reign. From disco to hip hop, the children and adults had a great time dancing to the familiar tracks.

Mellors finished the week with a Jubilee themed buffet treat for lunch which the children thoroughly enjoyed; the trifle got a particularly royal seal of approval!

Although the weather got the better of us for our Jubilee Singalong, we did manage to share all our singing with parent/carer(s) via Facebook!

It was a thoroughly enjoyable week to finish the half term.

PENNYMAN PRIMARY ACADEMY

Dear Zoo

During this term, Nursery children were able to share their learning with parents and carers in their very own performance of 'Dear Zoo'. The children loved sharing the story together. They used this as a stimulus for painting, writing, drawing and acting. What talented children we have!

Striving for the best

Some of our Year 6 children spent some of their Easter holidays in the academy taking part in revision games and activities in preparation for their SATs tests. We were so impressed with their attitude to ensuring they had the best possible chance at being successful. They had a great week and were lucky enough to finish the week with a Domino's Pizza Party!! Well done to all of our Year 6, we are super proud of how hard you worked to show how much you have learnt.

Green fingers

Year 5 have been growing their own sunflowers to link to their Science work. They have conducted science experiments associated with 'observations over time.' The children were lucky enough to have taken them home to nurture further. Well done Y5, we have some budding gardeners among us!

PENNYMAN PRIMARY ACADEMY

Budding scientists

This term, Mrs Newbold's class have been budding scientists. They started off by learning about how some materials are soluble or insoluble in water, and how some have reversible or irreversible changes - heating and cooling chocolate and eggs was fun! But don't worry they didn't eat them together! They then had a lesson all about magnets, learning about how they repel or attract. Mrs Newbold is lucky to have children who are mazing at science.

Animex Academy

The children in Y2 were given the opportunity to take part in a day of coding in association with the Animex Academy conference and Teesside University. At the start of the day, the children were asked to develop a story and create a plan based on 'The Day the Crayons went on Holiday'. Their ideas were wonderful. We had crayons going to Egypt to visit the pyramids, taking rockets to space and visiting Disneyland. Afterwards, the children turned their plans into Scratch Jnr projects where they wrote the code to add movement, transitions, speech and sound effects. They created some amazing projects and throughout the day, their work was shared with other schools taking part via a live blog. It was a fantastic experience and the children worked incredibly hard.

Making History

This term, the children in year 4 went on a trip to Ormesby Hall as part of their Pennyman Family topic. They helped the National Trust celebrate their 60th anniversary of being at Ormesby Hall. The children had a guided tour of the house, got a chance to look at the gardens and then designed their own individual squares that will be sewn together to make a quilt and displayed in the museum to commemorate 60 years.

Viking experience

To support the children's learning about Vikings and Anglo-Saxons, a local historian and actress was invited in to the academy to work with year 3 children to bring their learning to life. Through the use of artefacts, acting and role-play the children learnt about Viking life; their jobs and trades with other countries as well as their ship building and weaponry. All children had the opportunity to handle the artefacts as well as grinding flour using an authentic mill stone. The children thoroughly enjoyed the day and made learning memories to last throughout their education. What a great experience they had meeting Sif the Viking trader!

WILTON PRIMARY ACADEMY

Early Years

Mrs Barron's class have been making their own farmyards and learning the names of farm animals and their babies. This was then followed by an exciting trip to Tweddle Farm, where they got to meet, feed and learn about lots of different animals.

The children read the story of The Little Red Hen. Nursery could retell the story using actions and the class received a note from the hen asking for their help to make bread. They took delivery of some wheat to grind and wrote back to the hen. Making some bread was hard work with all the kneading, but it was delicious!

The class had a surprise delivery of some eggs. The children guessed what they thought would hatch out of them and two days later four gorgeous fluffy ducklings hatched. The children enjoyed caring for them and learning all about them.

Year 1 and 2

In computing Mrs Barron's class have been learning how to create an algorithm to move a sprite in a computer program. The children had to practice giving clear instructions to each other to move around the classroom using the directional vocabulary of right, left, quarter and half turn. Once they did that they had to program the sprite and then debug any errors.

They studied local artist McKenzie Thorpe and created their own paintings using a variety of materials such as paint, charcoal and pastels. After sending some of the pictures to McKenzie, they were really proud when McKenzie tweeted a response to their pictures.

In music, Mr Nixon has been teaching the children how to follow musical notation and use tuned instruments to copy and repeat rhythms. They can now play Twinkle Twinkle by following the notes on the screen.

Year 3 and 4

In Geography, Miss Norton's class have been looking at how the North East has changed, particularly since the Roman times and how, in fact, we still have evidence of their archaeology close to us. They then linked this to their writing, where they created some persuasive leaflets for visitors who may come to our local area.

In R.E, we learnt about how colour is significant in different religions and we also discussed how different colours make us feel.

The children received notification from the 'ROAD to RIAT' challenge, that the children had previously completed, to state that they had been chosen as regional winners! As part of their prize the children won £150 and, with this money lots of STEM games and activities were purchased for all classes in the academy.

WILTON PRIMARY ACADEMY

Year 5 and 6

All children successfully completed their swimming lessons, with the majority swimming at least 25m. They learnt how to rescue somebody if they were in trouble and how to get them out of the pool and shout for help.

A World At Work session held at AV Dawson was an interesting day for the children. They explored the occupations available in the Middlesbrough area and looked at programming robots. They were impressed with the views over the River Tees.

Year 6 also attended a transition workshop, run by Head Start, to explore their feeling around moving up to secondary school. They looked at whether they were nervous, excited or not really bothered about aspects such as a larger school, new teachers, new lessons and lunch! (The really important one!)

In preparation for the end of term, all of the children have been very busy designing a T-shirts to reflect their time at WPA (particularly poignant for year 6). This is their art topic looking at the impact of costumes and how they are created. The children have been recording what they remember throughout their school life and have created T-shirts using various media including pens, sewing, applique etc.

Queen's Diamond Jubilee

We thoroughly enjoyed our learning and celebrating for the Queen's Diamond Jubilee.

All classes completed some work in class, including learning lots of facts about our monarch, her role and why the monarchy is important. As part of the jubilee celebrations, some children designed, made and ate some very beautiful cakes fit for a Queen!

The children used different coloured icing to manipulate and create their designs. They read a factual book and text about her life and this resulted in lots of interesting and thought provoking questions being asked. In art, Miss Norton's class created sketches of some of the Queen's many homes and then painted these using some previously learned techniques. The week ended with a Street Party which unfortunately had to be held inside due to the weather. However, it was a lovely afternoon to celebrate with our families and the community.

TEES VALLEY EDUCATION

Business, Industry and Enterprise Institute @ TVED

We are proud of the communities that we serve. But did you know that they are built on a rich history of industry and enterprise?

On your way to our academies, you may catch a glimpse of the Transporter Bridge without realising that the prototype for all bridges like this were designed by Charles Smith in 1973 in Hartlepool.

Film industry pioneer, Ridley Scott, is from the North East and based the opening scenes of Blade Runner on the former ICI plant at Wilton.

Henry William Ferdinand Bolckow (1806-1878) was a Victorian industrialist and Member of Parliament, acknowledged as being one of the founders of modern Middlesbrough.

Middlesbrough born Maud Mary Chadburn CBE (1868 -1957), was one of the earliest women in the United Kingdom to pursue a career as a surgeon. She also co-founded the South London Hospital for Women and Children in 1912 with fellow surgeons.

Middlesbrough MP Ellen Cicely Wilkinson (1891 -1947) was a politician who served as Minister of Education from July 1945 until her death.

Middlesbrough born Sir Liam Joseph Donaldson (1949-) is a British doctor. He was formerly the Chief Medical Officer for England, being the 15th occupant of the post since it was established in 1855.

These historical figures, innovators and agents of change were shaped by the Teesside communities in which they served. We believe that industry, business and enterprise continue to define our communities. We know that our children are the future innovators and agents of change in Teesside and beyond.

As part of our Institute, children will be learning both in the classroom and in other locations linked to our business, industry and enterprise partners about all the amazing opportunities they have open to them.

You can find out more about our updated opportunities for all children and what their business, industry and enterprise journey will look like by visiting our new website: www.teesvalleyeducation.co.uk

Arts Week 2022

Tees Valley Education have been taking part in Arts Week and some wonderful work has been produced. The academies have enjoyed a wide range of art activities, many of which have also been linked to our newly updated trust-wide Art offer. It uses key artists such as Peter Thorpe, Andy Warhol and Mackenzie Thorpe as the key drivers of the learning as well as a focus on drawing in addition to other various artistic techniques.

Across Year 1, children created pieces of art work using the theme of 'The Seaside.' They created beach scenes and made jelly fish out of paper plates! In Year 2, the children practiced their painting, sewing, collage and weaving skills to produce some art work that they were very proud of. Other year groups created art work linked to their curriculum topics and showcased this in their classrooms. The children had lots of fun using the skills that they have learnt during the past year and applying them to a new piece of work.

TEES VALLEY EDUCATION

Young Voices

TVED recently took part in 'Young Voices'. An opportunity to be part of the largest school choir in the world. The pupils from Brambles, Dormanstown, Pennyman and Wilton Academies travelled by coach to Sheffield for an amazing day of singing.

Upon arrival in Sheffield the pupils enjoyed lunch in fabulous restaurants, which included Bella Italia and Pizza Express. They managed a three course meal, washed down with lots of juice and were then ready to start rehearsals in the arena.

The three hour rehearsal was challenging, fun and at times quite active with a whole range of moves that accompanied the singing. The children rehearsed with a live band, rappers, street dance choreographers and live singers.

The children got changed into their very own 'Young Voices' t-shirt's and were ready to perform. The concert started at 7pm and was a marvellous experience for everyone, staff and children.

A choir of 5000 pupils performing to a gathered audience of 5000 parents and carers, including many from our own

academies. The children performed hits by 'The Beatles' amongst an exciting and varied repertoire.

We travelled home tired, but pleased, with huge smiles after an amazing day out. Thank you to all the staff who went the extra mile to get these children performing in such an exciting venue.

Industrial Cadets - Carbon Capture Challenge

It has never been more important to build a set of essential skills to succeed in life for our children: the ability to creatively solve problems, to self-manage, to communicate effectively, and to work well with others. Therefore, we invited the 'Industrial Cadets' into our academies to build pathways through education and employment through an industry led programme. Promoting the development of the next generation of UK's young minds, Industrial Cadets is a kite mark for schools and students seeking valuable and exciting STEM opportunities (Science, Technology, Engineering and Mathematics) .

Across the trust, pupils worked with Industrial Cadets to offer active learning experiences in STEM related careers, giving them pupils the opportunity to gain knowledge and exposure that will help them make decisions about their future. Through each workshop, students engaged

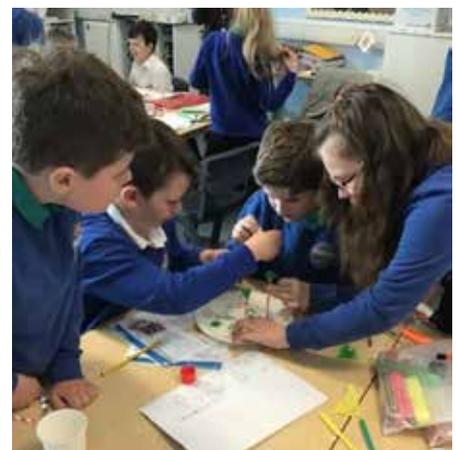

with STEM subject areas whilst taking part in hands on activities. The day was designed to excite and enlighten our students on how STEM is fun, interesting, and results in a rewarding career.

The 'design, build and test' activities also helped build our children's soft skills of teamwork, communication, time management, creativity and problem-solving.

Pupils in Year 5 across Dormanstown and Wilton worked hard to combat climate change. In teams of four, the pupils created eco-gardens, specifically designed to reduce CO2 in the Atmosphere. Then, using their oracy skills, presented their ideas to the class.

Diamond Standard Awards

2021/2022

'Shine bright like a diamond'

The Trust Diamond Standards are something we are all immensely proud about.

It was a privilege to witness so many children, colleagues and families recognised across each of the Diamond Standards as part of our recent summer awards ceremony.

We were delighted to make the event extra special this year with the help of our VIPs (Very Inspirational People).

A particular thanks to Professor Dorothy Newbury-Birch (Teesside University), Jason Brine (Chair of Trust Board at TVED), Helen Dudiak (Trust Board member), Kirsten Donkin (PD Ports) and Sister Anita (Member, TVED) for their valuable and inspirational contribution to our event.

Professor Newbury-Birch, Professor of Alcohol and Public Health Research at Teesside University, said, "It was such a privilege being a VIP at the event and I am inspired by the children and adults that have achieved so much in the last year. The last academic year will have been challenging for so many of us, yet these individuals have truly shown what is brilliant about our region in their dedication to others and doing their very best".

Children, staff, parents, carers and community representatives being amazing in any of the four areas deserve the public recognition for making our academies, the Trust and our wider communities a better place.

We are all diamonds: none of us start off polished, but with the right environment, time, support and development we become brilliant.

TEES VALLEY EDUCATION

A deserved congratulations to all of the finalists including the overall winners who have been recognised for their additional dedication in the academic year 2021-22.

It was very difficult to choose winners this year due to there being so many prospective award winners. This truly is a hall of fame of our winners. Our winners, alongside all of those individuals that have been nominated, are shining diamonds across our communities.

Brambles Primary Academy

I personally thank all of our teachers, staff and volunteers for doing everything possible to return our academies to a normal year in 2021-22 and what a year it has been – your hard work is appreciated! Thank you also to all parents and carers for your continued support of everything we do at Tees Valley Education.

Our children have been taking part in numerous events across our academies with World Music day, Children's Art week, Share a Story month, Learning Disability week and Industrial Cadets workshops to name but a few and Trust wide events brought pupils across our academies together this year including Young Voices this Summer term.

We are continuing to develop our network of professional partners at the Trust to help deliver real amazing world opportunities and experiences in arts & culture, science & technology, business & industry as part of our long-term commitment to supporting our children, families and communities. In delivering education to our children we build on our area's rich history of industry and enterprise. Pupils are already benefitting from inspiring experiences inside and outside the classroom from our long-standing partnerships with PD Ports and Teesside University and this term some children were able to look at the science and technology behind motor racing with a visit to a British Touring Car Championship racing team.

It is clear in this Newsletter that all our children reflect our Diamond Standards and with commitment, curiosity, courage and care they have thrived and flourished this year. It was wonderful to end the year with our Tees Valley Education, Diamond Standards Awards winners at Middlesbrough Football Club and hear about the celebrations in all our academies for everyone nominated for awards during the year. Who will top the podium next year... could it be you?

We all wish our Year 6 leavers the best of luck in their future destinations. You will be greatly missed but not forgotten! With the Tees Valley Education spirit of commitment, courage, curiosity and care we have complete faith in you and we can only imagine what you will achieve.

In closing, on behalf of the Trust I would like to reflect on the legacy left by Ms Gleave at Brambles Academy from her tireless commitment to her community and the quality of teaching and support she delivered. Ms Gleave was a great woman and an inspirational Head Teacher without whom Brambles would not be the outstanding academy it is today. I am not alone in feeling her loss but I hold a massive amount of gratefulness for having known such a great woman.

Hoping you and your families have a wonderful summer break.

Mr J Brine
Chair of the Trust Board
